SUMMARY

Backend-focused Software Engineer with **+8 years** of experience in **Python** and **Go**. Creator of **Panther**, a Python web framework focused on performance and simplicity, with **180K+ downloads**. Experienced in building **scalable systems**, **performance tuning**, and **leading development teams**.

SKILLS

Languages & Frameworks: Python | Go | Django | Gin

Databases: PostgreSQL | MongoDB | ClickHouse | Redis

Monitoring & Logging: Grafana | Prometheus | Loki | FluentBit | Promtail

Infrastructure & DevOps: Docker | Swarm | Kubernetes | Ansible | GitHub Actions | GitLab CI | Jenkins | NginX | Traefik | Vagrant | Linux | Git

Messaging & Data Pipelines: RabbitMQ | Kafka | Celery | Spark | WebSocket

PROFESSIONAL EXPERIENCE

Software Engineer, Yektanet [🔗](#) 05/2024 – present

- Designed and optimized a **Frequency Cap system** to control ad exposure, using **Golang**, applying **A/B testing** insights to boost CTR by ~2% and reduce repetitive ad impressions by ~15%.
- Set up a dedicated **Redis Cluster** to handle Frequency Cap data efficiently.
- Implemented a new *Brand Awareness* ad service and managed it **end-to-end**, automating a workflow previously done manually by several people.
- Built Reach reporting pipelines from **HDFS** using **Airflow DAGs**, **HyperLogLog**, and **ClickHouse** to show aggregated **unique users over time** across multiple dimensions.
- Developed **financial reporting** and balance tracking pipelines for a new monetization model using Airflow and **Spark**.
- Developed a sub-service to continuously monitor Golang services hourly using **pprof**.
- Refactored inefficient database queries**, significantly improving system performance.

Panther Web Framework [🔗](#) 11/2023 – 05/2024

- Developed a fast Python web framework (Top 3 on TechEmpower benchmarks)
- Reached **+180,000 downloads** (pepy.tech)
- Wrote **documentation**, managed GitHub releases

Software Engineer, Digikala Group [🔗](#) 12/2022 – 11/2023

- Built **database replication** systems for **high availability**
- Designed a **promotions engine** for complex discount scenarios
- Integrated multiple **third-party APIs** for logistics and payments

Software Engineer, Hamrahe Aval [🔗](#) 01/2022 – 12/2022

- Built a national **Learning Management System** (Shad.ir)
- Developed an **S3-compatible object storage system** (similar to MinIO)
- Created **bot management** tool, “Bot Father” on Rubika (**37M+ users**)

Backend Team Lead, ReVision 01/2020 – 12/2021

- Led backend teams** for products including Sandbad, ReVPN, ReMenu, and Podingo
- Managed **cross-functional team** in a fast-paced startup environment

- Freelance Developer**

2018 – 01/2020

 - Delivered multiple full-stack applications using **Django REST Framework** and Flutter.
 - Developed and published a Flutter package, **number_selection** [↗](#), with around 60 monthly downloads.

EDUCATION

- PhD Candidate in Computer Engineering (System Architecture)**, Islamic Azad University - Tehran North Branch

2024 – present
- MS in Computer Engineering (Software)**,
Islamic Azad University - Tehran West Branch

2021 – 2023
- BS in Computer Engineering**,
Islamic Azad University - Tehran North Branch

2016 – 2021
